EXPERIENCE

Freelancer, Brazil

September 2021 - Present

Project: **Antares Solar PV Kit Sizing** ([Link](#)), [Figma](#) prototype

Led the development and deployment of Antares Solar, a software for Brazilian installers, focused on PV Kit Sizing and proposal generation, utilizing technologies such as Laravel, Python, Next.js, Prisma, and more. Managed seamless integration of front and back-end technologies, ensuring robust performance and reliability. Administered advanced database and AWS solutions, emphasizing data security and optimized performance. Oversaw the entire project lifecycle, collaborating with cross-functional teams to align on project goals and deliverables.

Trading Analyst and Strategy Developer,

Cryptech Enterpsies - Remote

September 2021 - May 2022

Served as a key analyst and strategist for Cryptech Enterprises, specializing in cryptocurrency trading. Developed and optimized diverse trading strategies to ensure portfolio growth and risk mitigation in varying market conditions. Automated critical trading processes and strategies, enhancing operational efficiency in high-paced environments.
